SPECIALIZED EXPERIENCE: Must have 18 months experience and/or training in functions such as repairing, modifying, fabricating, assembling and installing aircraft metal, plastic, fiberglass, bonded and honeycomb structural parts, components and assemblies.

BRIEF JOB DESCRIPTION: This position is located within a National Guard aircraft maintenance organization. Its primary purpose is to accomplish the inspection, repair, modification, installation and troubleshooting of sheet metal, fiberglass, bonded honeycomb and other structural materials and components as well as treatment (i.e., mechanical and chemical), and painting of missiles, aircraft, powered and non-powered Aerospace Ground Equipment (AGE), and monitoring aircraft and equipment washing. Independently inspects aircraft and determines the nature and extent of repairs to be made, using applicable technical orders as guidelines. Repairs cracks on aircraft skin. Troubleshoots aircraft structural repair situations in such areas as fuselage, tails, wings, and stabilizers. Inspects damage or deterioration and determines repair or replacement of plastic, fiberglass, composites, bonded structures, and bonded honeycomb assemblies using powered and non-powered tools and equipment. Manufactures and ensures that metal tubing and conduits are fabricated and tested in accordance with drawings and specifications. Performs fabrication of local manufactured items required for aircraft and equipment. Sets up and operates power shears, brakes, rolls, dimpling machines, drill presses, saws, portable powered tools, specific detection and measuring equipment, and other metal working equipment including use of other tools of the trade. Prepares and designs layout, dies, jigs, and templates necessary to carry out fabrication repair or modification of aircraft, engine, AGE, and other equipment. Identifies and treats metal corrosion. Removes corrosion by mechanical and chemical procedures to include use of portable powered (electric and pneumatic) sanders, buffers, brushes, bead blasters, vacuum cleaners, scrapers, grinders, acids, caustics, solvents, alcohols and other agents used in corrosion control procedures. Applies protective coatings, markings, and decals after proper removal of corrosion and treatment of metals. Identifies, blends, stores, controls, and disposes of hazardous materials such as acids, caustics, alcohols, solvents, cleaners, primers and surface coatings used for corrosion removal, treatment and protection in accordance with applicable directives. May operate the wash rack facility. May assist in training of drill status guard members and maintenance of publication files of applicable technical orders, regulations, manuals and local directives. Prepares for and participates in various types of readiness evaluations such as MEI, ORI, IG and UE inspections mobility and command support exercises.
